SOTEC	25/10/2017 1400hrs	s33a(ii)	Serious Injury	s33a(ii) Training Area	Closed	<p>Member was attending s33a(ii) Course, in the s33a(ii) Training Area, during a medical check late in the night the member noticed a rash on his right leg and reported it to the medical staff.</p> <p>Cellulitis is a bacterial infection of the skin and subcutaneous tissues (just under the skin). The most common bacteria are staphylococcus aureus (golden staph) and group A beta-haemolytic streptococcus. These bacteria enter broken or normal skin, and can spread easily to the tissue under the skin. You will need antibiotics to treat the infection.</p> <p>Cellulitis can affect almost any part of the body. Most commonly, it occurs on the lower legs and in areas where the skin is damaged or inflamed. Anyone, at any age, can develop cellulitis. However, you are at increased risk if you smoke, have diabetes or poor circulation.</p>	The Doctor attached to the course diagnosed Cellulitis and prescribed oral antibiotics. A few hours later the rash had not improved. The member was removed from the field environment, back to s33a(ii) Barracks and was placed on an IV drip with antibiotics.	Ongoing Treatment	s33a(ii)	s33a(ii)
SOTEC	25/10/2017 2200hrs	s33a(ii)	Serious Injury	s33a(ii) Training Area	Closed	Member was conducting a water resupply activity, involving water jerries, as part of the s33a(ii) Course. The medical staff noticed the member was struggling and removed him from the activity.	The doctor diagnosed the member as having heat stress as well as being dehydrated. He was given fluids through IV and initiated cooling measures to lower body temperature. The member recovered and wanted to continue with the activity, however the medical staff removed him from the course.	Hospitalised	s33a(ii)	s33a(ii)
SOTEC	28/10/2017 1308hrs	s33a(ii)	Serious Injury	Other Rank lines s33a(ii)	Closed	The member completed the s33a(ii) Course. On the weekend, after the course was completed, the member was on rest. He noticed both knees had scratches and were red and the infection was getting worse.	Member presented at the s33a(ii) Health Centre and was put onto antibiotics though IV. Later diagnosed as Cellulites.	Hospitalised	s33a(ii)	s33a(ii)
SOTEC	11/12/2017 1445hrs	s33a(ii)	Serious Injury	s33a(ii)	Closed	s33a(ii) is part of the s33a(ii) Cycle. He was attending the s33a(ii) Course and was conducting a s33a(ii), at the s33a(ii). During his descent the member failed to s33a(ii). He tried to apply his emergency brake. However, he descended rapidly to the ground through his descending device. The member impacted hard with the ground and sustained fractures to both lower legs.	The member was treated at the site by the medics supporting the course. He was conveyed to s33a(ii) s33a(ii) Emergency Department. The area was cordoned off and the members equipment was quarantined.	Ongoing Treatment	s33a(ii)	s33a(ii)
