# Community Information Session

## PFAS Investigation and Management Program

**RAAF Base Pearce**  
**Update on Scheme Water Supply**

December 16, 2022

## Acknowledgment of Country

We respectfully acknowledge the Noongar people, the traditional custodians of the land on which this meeting takes place, and also pay respect to Elders both past and present.

# Welcome

## Session outline:

- What will Defence provide?
- What will the agreement look like?
- Timeline for supply of scheme water infrastructure to Bullsbrook
- Timeline for West Bullsbrook property connections
- Questions

## Speakers:

- Dan Fankhauser, First Assistant Secretary Infrastructure, Defence
- Jason Nielson, Senior Civil Engineer, GHD

## What will Defence provide?

Defence will fund:

- Construction of the main scheme water infrastructure
- Connection of individual properties to the scheme water infrastructure
- Necessary plumbing modifications to residences
- Reinstatement of disturbed ground following plumbing works, to the extent practicable
- Water usage and water service fees for a period of six years, with a review to occur before the end of this period to determine future arrangements

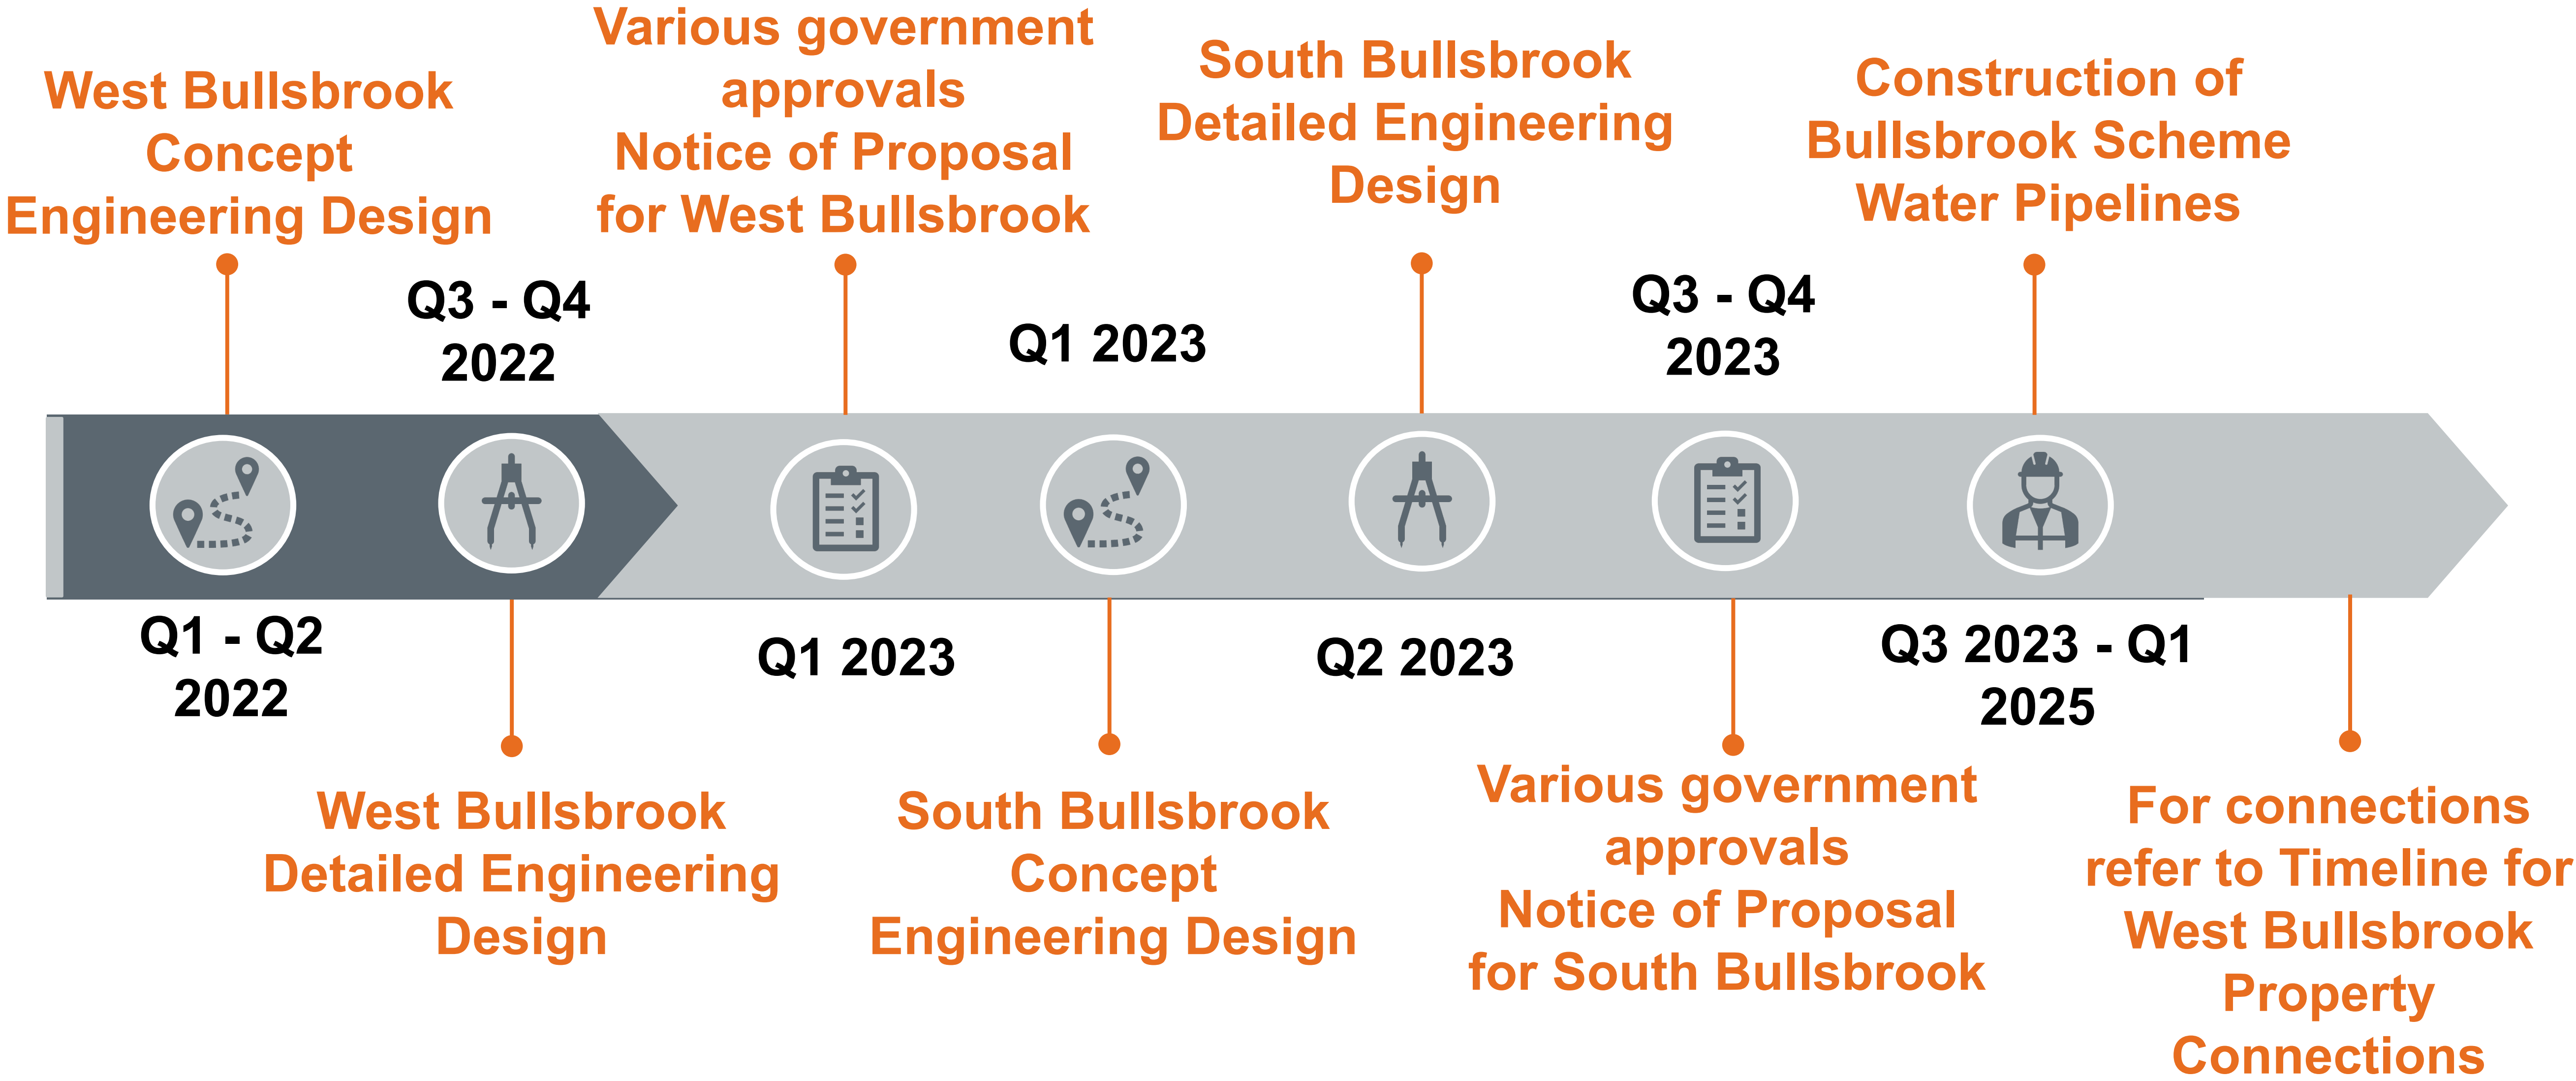

## What will the agreement look like?

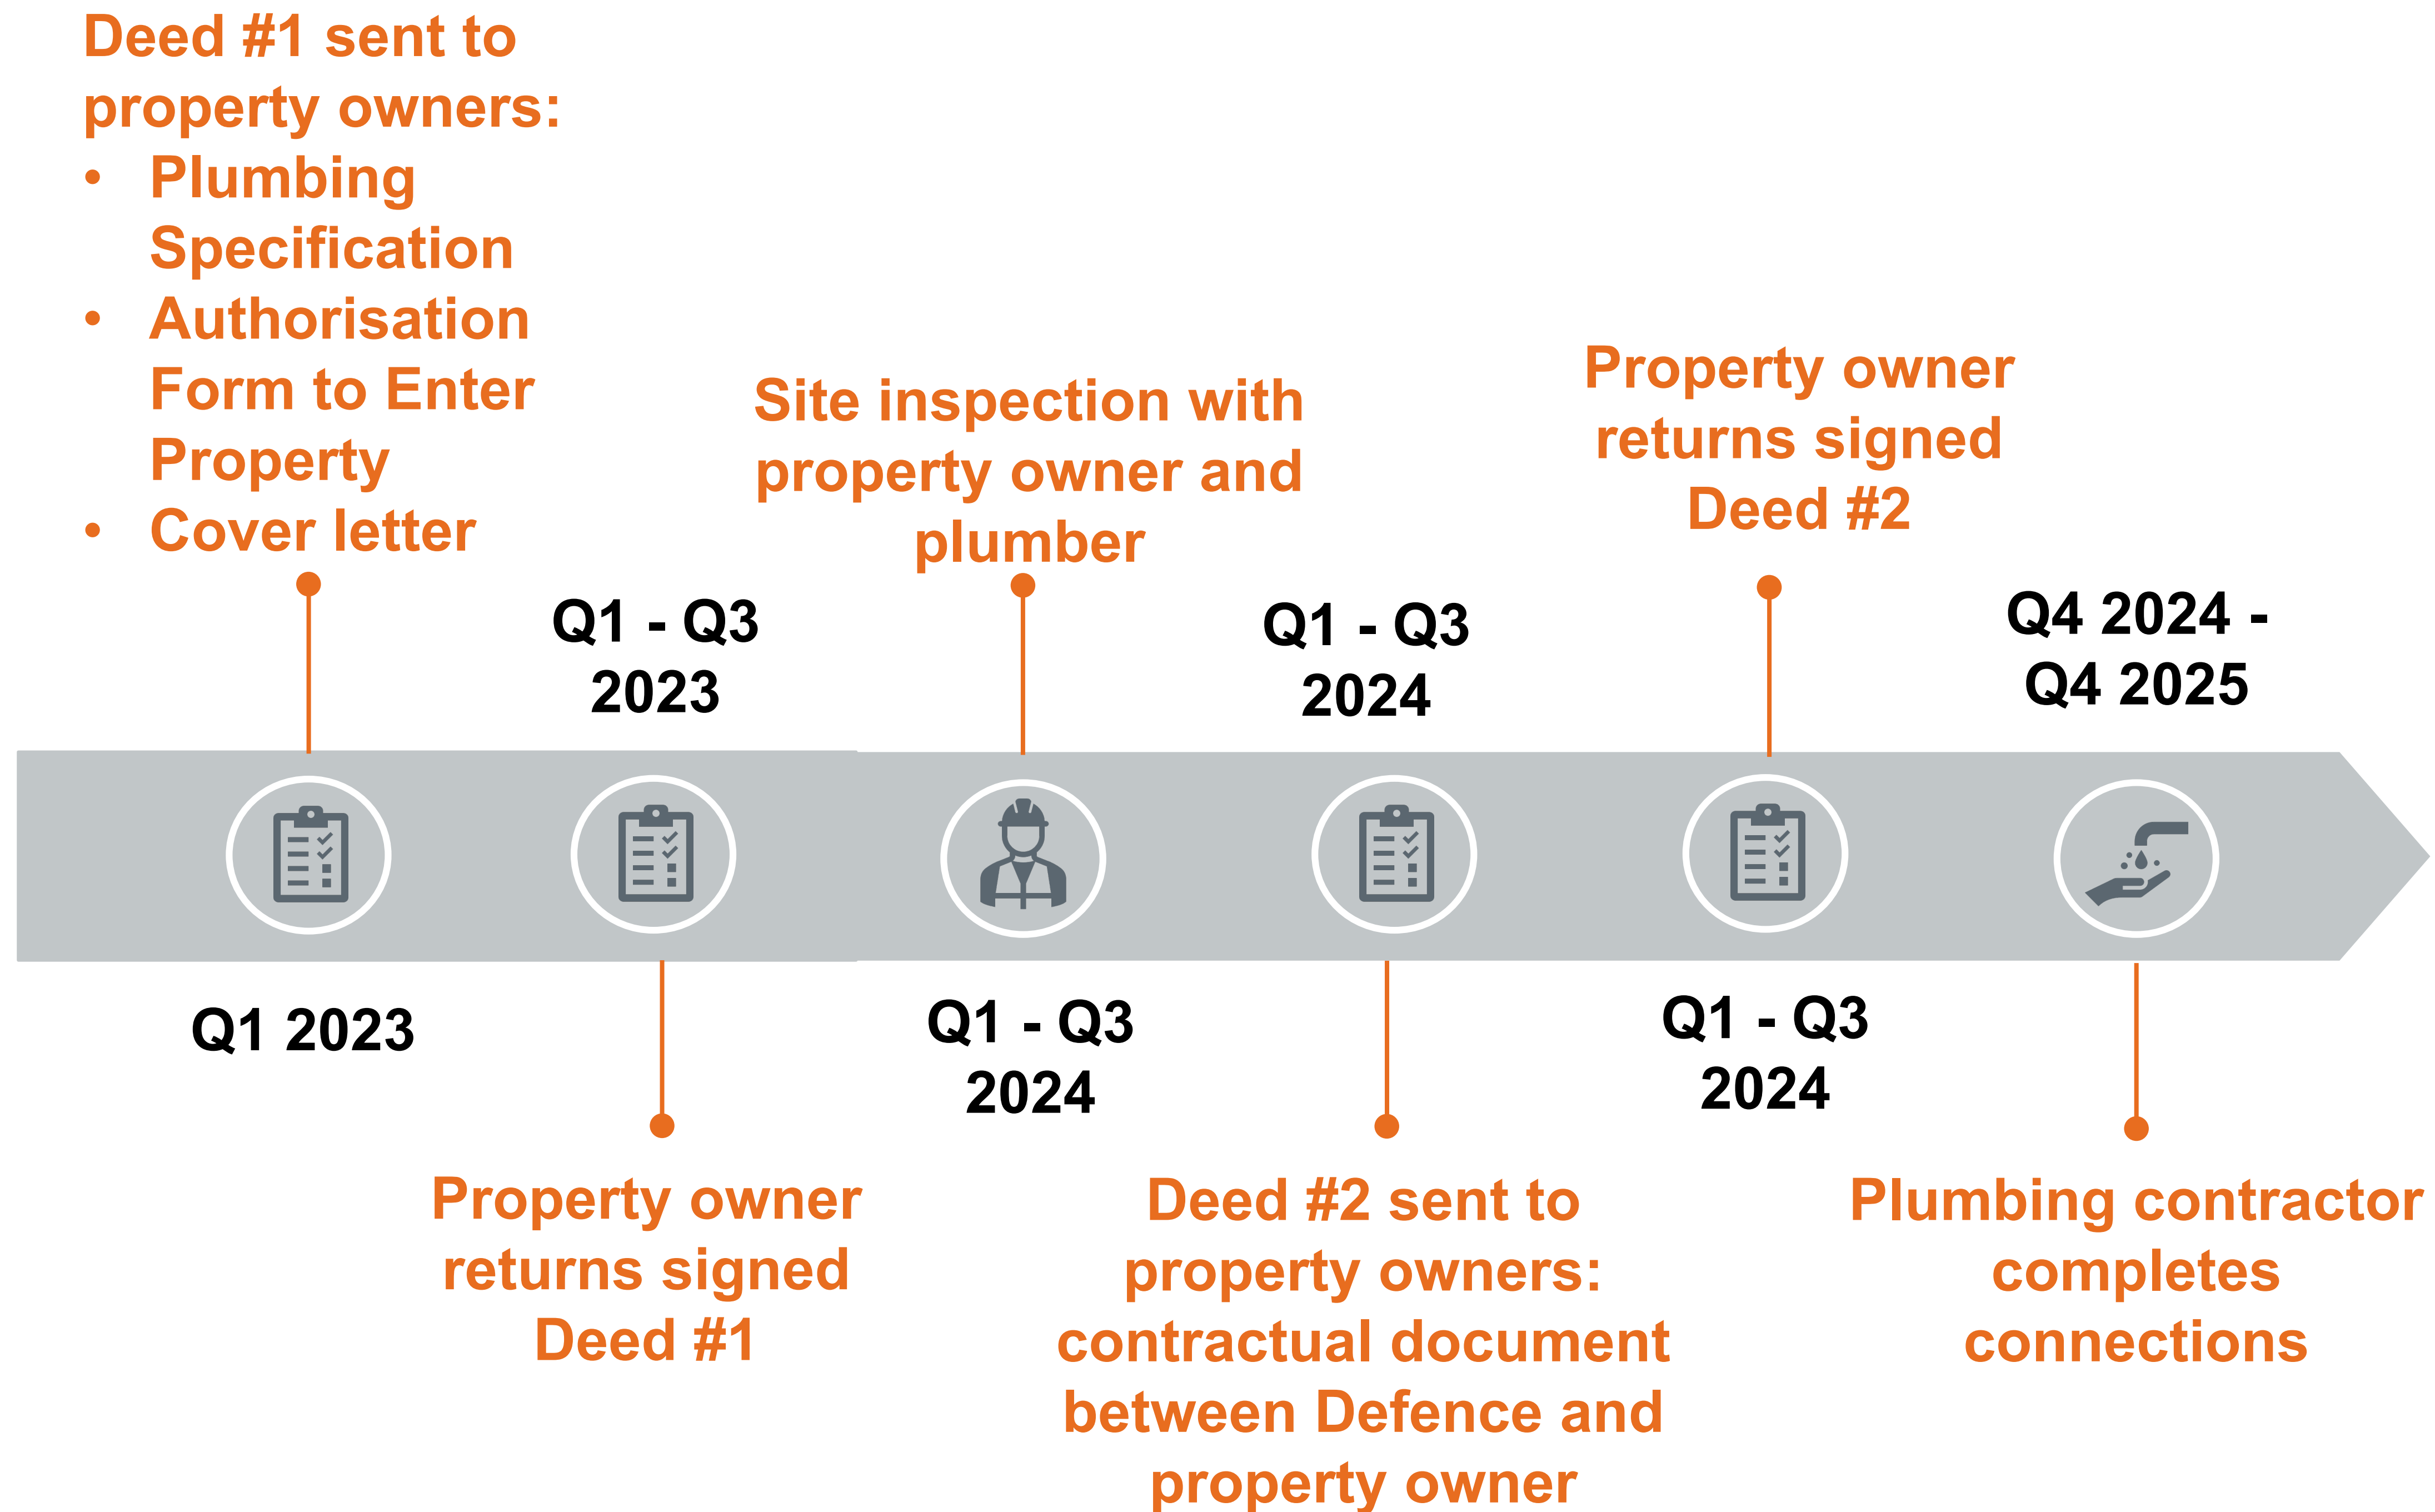

If you choose to connect to scheme water, there will be two contracts :

- Deed #1 will authorise a civil contractor to have access to your property to install a service connection just inside the property boundary.
  - The plumber will then arrange a time with the property owner to visit the property and scope the necessary works.
- Deed #2 is where the property owner agrees to connect to the scheme water network.
  - It will include the scope of plumbing works specific to the property, and agree Defence's funding of scheme water usage and rates for the next six years.
- Deed #2 will not be issued unless Deed #1 is signed and returned.
