

# SITZLER

## USFPI NT Ranges & Training Areas Project

(Project Value ~ \$500M)

Sitzler Pty Ltd is a highly regarded Australian construction company delivering quality projects on an environmentally and socially conscious manner.

One of the largest privately owned construction companies in Northern Australia.

A collaborative and client-centred industry specialist focussed on building and civil construction solutions.

Sitzler have expanded considerably across Northern Australia, South Australia and Western Australia over the past 40 years to service the needs of our clients.

# Current Projects

## AIR700

Construction of facilities and infrastructure to support AIR7000 Phase 2B at RAAF Base Darwin for the Department of Defence. These works will be undertaken in preparation for a transition to Boeing P-8A aircraft by the RAAF, and include:

- An extension to the military hard stand
- New apron hardstand
- New fuel hydrant line extension
- New aircraft rinse facility
- New and relocated floodlighting towers
- Flexible and rigid pavements
- Aeronautical ground lighting
- Below ground services and infrastructure

## USFPI Accommodation

Construction of accommodation at RAAF Base Darwin for MRF-D personnel.

The proposed solution to achieve this outcome is the provision of modular (dismountable) accommodation to create an MRF-D residential area at RAAF Base Darwin for up to 500 personnel.

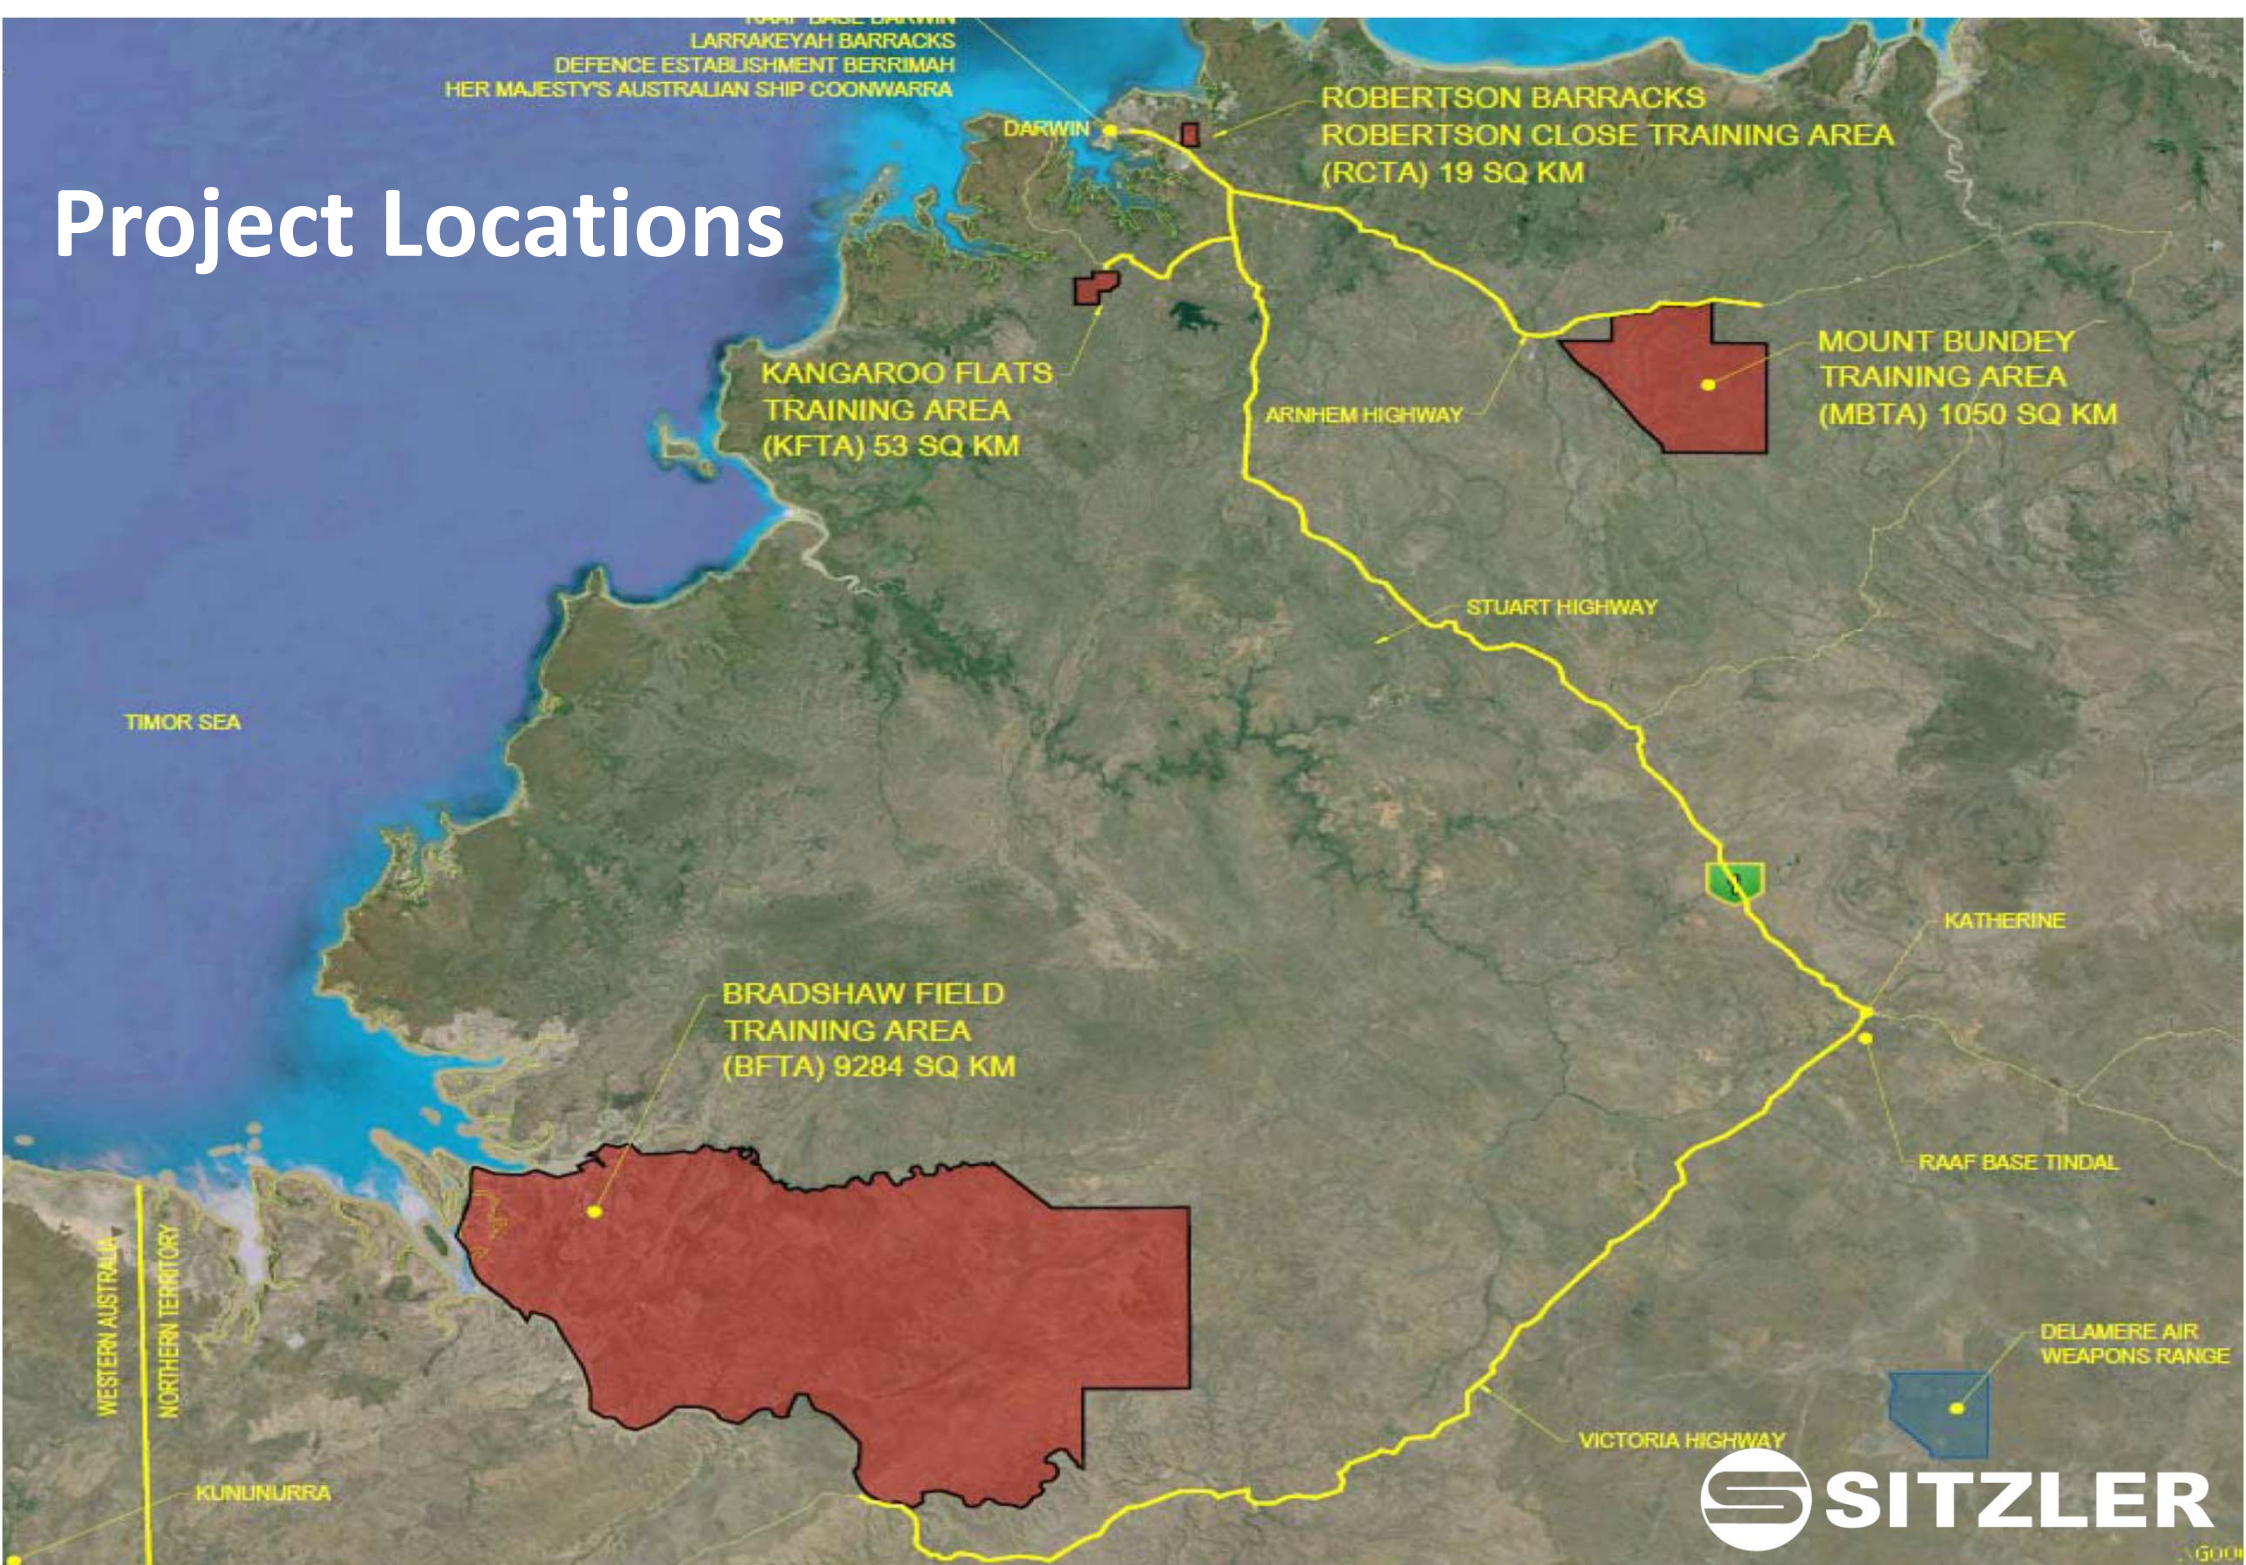

# USFPI NT TA&R Project Objectives

- Provide infrastructure essential to support the increased tempo and/or range of activities at the training areas with the joint use by ADF and US forces;
- Enhance training outcomes through flexible training areas incorporating existing and new ADF weapon types and ammunition as well as allowing training in-line with the Combat Marksmanship Continuum and future technology advances;
- Support increased demand for the training areas, in particular from the Marine Rotational Force – Darwin (MRF-D); and
- Improve reliable access to fit-for-purpose TA&R

# Project Locations

# USFPI NT TA&R Project – Indicative Program

- MC Contract Award 24 September 2019
- Planning (Design) Phase Complete June 2021
  - 5% Master Plan – February 2020
  - 30% CDR – June 2020
  - 50% SDR – September 2020
  - 90% DDR – March 2021
  - PWC Hearing – March 2021
- Delivery (Construction) Phase
  - Commences – June 2021
  - Commence on Site – October 2021
  - Completion – October 2025

# USFPI NT TA&R Project – Local Industry

- Committed to maximum level of local industry and indigenous business engagement
- Local defined differently for Bradshaw FTA
- Engagement with ICN NT
- Conduct of a program of information sessions and engagement with local industry
