

Navy Capability Infrastructure Sub-Program

Henderson

Located at 103 Quill Way, Henderson, the site is 30km south of Perth and 25km from HMAS *Stirling*. Acquired in February 2020, Henderson is within the Australian Marine Complex which enables Navy to engage with Industry directly to support ship building and capability sustainment.

Office Accommodation

Office Accommodation to support maintenance and command functions will be constructed on the western side of the acquired site. This facility will support the Arafura Class Offshore Patrol Vessels and Hunter Class Frigates including their crews when the vessels are in maintenance at the adjacent site.

The site plan is designed to cater for future expansion to support other capabilities or additional though-life logistics and maintenance facilities on the eastern side of the site.

Engineering services infrastructure will be provided for each of the facilities, including electrical supply and distribution, roads and car parking, site access control, and stormwater and sewerage.
