

## Navy Capability Infrastructure Sub-Program

### St Kilda Transmitting Station Works

The St Kilda Transmitting Station is an existing Defence Establishment located in the City of Salisbury, 30km north of Adelaide. The development includes a new Land Based Test Site.

#### Office Accommodation

The works include construction of a facility that will provide office accommodation, technical laboratories and equipment storage.

### **Engineering Services Infrastructure**

New engineering services infrastructure will be provided, including:

- electrical supply and distribution
- roads and carparking
- stormwater and sewerage
- site access control.
