

**2025 ANEF MAP**

The aircraft noise contours on this map are based upon a forecast made in August 2011 of aircraft movements and aircraft types for the year 2025. This forecast is used as an input to the INM model to create the 2025 ANEF footprint. The model applies weightings to aircraft movements for different times of the day. Although the forecast has been prepared for use with AS 2021-2000 and in accordance with accepted industry practice, actual noise levels can vary according to actual aircraft movements and environmental conditions.

- LEGEND:**
- 2025 ANEF CONTOURS
  - DEFENCE PROPERTY

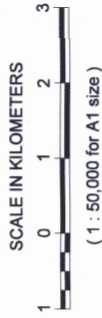

ANEF CONTOUR MODELLED WITH INM V6.2a, INCORPORATING TERRAIN DATA. CADASTRAL DATA DATED 2008 (SUPPLIED BY THE DEPARTMENT OF DEFENCE)

**ENDORSEMENT**

I am satisfied that the data used in the production of the Summary report and this ANEF map is correct at the time this forecast is made, and endorse this ANEF map.
