

Raytheon Australia

CAPABILITIES BEING SOUGHT

LAND, SEA, AIR, SPACE DOMAINS
DESIGN, MODELLING, MANUFACTURE, TEST OR SUPPORT

TECHNOLOGIES RELATED TO:

- Hypersonics
- Artificial intelligence and machine learning for:
 - C4ISREW cyber
 - Surveillance
 - Radar & radar algorithms
 - Undersea capabilities
 - Autonomous systems
 - Space
 - Remote operation and maintenance
- Simulation and Modelling
 - Operations / training
 - Engineering

CONSOLES AND CABINETS

SHELTERS

METAL PRODUCTS

- CNC machining
- Casting
- Forging
- Forming
- Additive manufacturing
- Powdered metals
- Metal injection moulding
- Treatments & coatings
- Inspection & testing

COMPOSITES

- Lamination
- Filament winding
- Moulding

ENERGETIC MATERIALS

RF / MW SYSTEMS & COMPONENTS

- Transmitters, receivers and transceivers
- Major & minor RF/mW Components
- Antenna

ELECTRONIC COMPONENTS

- Battery technologies
- Power management
- Capacitors
- Power supplies
- Micro-electronics
- Printed wiring board manufacture
- Circuit card assembly

CABLE ASSEMBLIES
