OFFICIAL

Good afternoon all,

On consultation with AIRSP team, we are requesting all divisions to review the attached brief and advise Coord of any input they have to add in regard to the below points:

- Whether there is R&D on UAPs conducted in Australia
- If not, what Australia's opportunities could encompass
- How we do/don't align to the US work

Please return either input or a nil response to Coord by **1200 Wednesday 20 September**.

Sincerely,

s47E(d)

OFFICIAL

Dear Shane, AIRSP team,

RAAF have confirmed the UAP Senate Estimates brief can be co-developed, and will be included in both CDS and CAF Senate Estimates packs for the October hearing.

Please ensure the DSTG input covers the below:

- Whether there is R&D on UAPs conducted in Australia
- If not, what Australia's opportunities could encompass
- How we do/don't align to the US work
- Handling note: Tanya would lead on [INSERT TOPIC]

Grateful if the attached brief version is updated with DSTG contributions in yellow highlight and return C/AIRSP cleared input by **12pm 20 September 2023**.

Important note: this development means AIRSP Division no longer needs to draft group level briefs (email attached), and the deadline of 29 September no longer applies.

Kind regards,

s47E(d)

Hi Shane,

Thanks for getting back to me.

Tend to concur, I'll engage further with RAAF and let you know the preferred approach.

In the case we provide input to the RAAF brief, input will need to cover what Australia's position may be, how we align to the US, where Tanya would answer questions etc.

Kind regards,

Hi s47E(d),
) I too have been contemplating our approach for this brief. Given the majority of the focus will be on policy and process considerations and we don't currently have any I,S&T in this area, my recommendation is that we align with the same approach taken for HAPS and Hypersonics i.e. RAAF take the lead and we review and supplement with DSTG elements. Can you please liaise with AFHQ to determine the best way forward?

Thanks
Shane

Good afternoon AIRSP,

Spoke further with RAAF, upon CDS request, for consisting messaging between CDS and CAF at the upcoming Hearing. Confirming that CDS only wants to be across the topic alongside CAF (not lead).

Please advise whether it would be better to co-develop this brief with RAAF, and insert DSTG input rather than complete the new brief request of SB23-000945. This would be similar to the approach we've undertaken with Hypersonics and High Altitude Balloons briefs.

To summarise, let me know whether the DSTG content would be substantially different from the CAF brief or supplementary. We can then re-assess the appropriate way forward to ensure both CAF and CDS are properly briefed.

Happy to discuss further.

Kind regards,
