The **Defence Enterprise Resource Planning (ERP) Program** is an Enterprise-wide priority and a key part of the Defence transformation agenda.

ERP will enable Defence to better adapt and evolve to meet strategic challenges. Defence Industry plays a key role in ensuring the transition to ERP is successful.

Find more information and stay informed via the Defence ERP webpage

## Top features of ERP for Defence Industry

- ✓ Drive **alignment** and **standardisation** across Defence, making it simpler for Defence Industry to engage with Defence and support capability across different areas.

- ✓ Remove ageing and disparate systems, which will **simplify tools and processes** used by both Defence and many of Defence's industry partners.

- ✓ Introduce the **SAP Business Network for Procurement,** providing near real-time status updates – facilitating greater efficiency, visibility and transparency for materials management across the order cycle.

- ✓ Provide **improved quality of real-time data** within Defence, making it easier for Defence Industry to access the data they need to make better informed decisions, and to support more accurate capability planning and workforce management.

Snapshot of Tranche 1B Main changes for Defence Industry

1 The **Defence ERP Solution** will replace a range of Defence systems used by industry partners today. In line with this, there will be new processes and ways of working.

2 A **new Enterprise Asset Management Framework** for Defence materiel will be implemented impacting industry partners supporting asset engineering and asset maintenance in Land based systems.

3 The delivery of an integrated **supply chain capability** will impact industry partners involved in Defence warehouse and inventory management.

4 The **SAP Business Network for Procurement** will be introduced offering Defence Industry new ways to transact with Defence.

5 There will be **new master data standards and governance** which industry will need to follow.

6 Impacted industry partners will need to **participate in ERP training** in the lead up to Go Live.

Defence ERP

Defence ERP is delivering a range of capabilities

Enterprise Resource Planning Program

- **Tranche 1 Release 1A** an early release of Finance foundations providing an enhanced reporting capability
