

1. Section G: Public AIC Plan

Public AIC Plan Periscope In-Service Support

Company Details

Company Name: BAE Systems Australia Limited
 Company Location: 1 Taranaki Road Edinburgh SA 5111
 Website Address: www.baesystems.com/australia

Executive Summary

The Periscope In-Service Support AIC Plan continues BAE Systems' extensive Australian Industry involvement in support of the fleet of Collins Class submarines.

The Periscope In-Service Support (ISS) Contract is a contract to provide engineering, maintenance and supply support, ranging from the following:

- All aspects of maintenance - that fall within BAE Systems area of responsibility - including Deeper Level Maintenance (DLM) of Repairable Items (RI), maintenance of Government Furnished Support and Test Equipment (GFSTE) and maintenance of Government Furnished Equipment (GFE).
- All aspects of engineering - that fall within BAE Systems area of responsibility - including analysis of procedures and engineering support of RIs, GFSTE and GFE.
- All aspects of provisioning, inventory management and supply support.

CCP 015 duration is 3 years starting from 01/07/2022 and finishing on 30/06/2025.

The current CCP value is \$46,377,183AUD.

Over 75% of the contract value is being delivered by Australian industry.

Current Australian Industry participation is shown in the table below.

| Australian Contractor | Local Industry Activity | Location |
|---|---|----------|
| BAE Systems Australia | Management of the Periscope ISS contract including Engineering, Maintenance and Supply Support | SA & WA |
| Allyn International | Freight and handling services | SA & WA |
| Bauer Engineering | Remove/Dispose/Supply/Install Periscope Radar Absorbent Material (RAM), OEM | VIC |
| BAE Systems Australia | Build to print Manufacturing and Servicing of Mechanical, Electrical, Electronic and Optical Periscope components | SA |
| Toolcraft Australia | Build to print Manufacturing and Servicing of Mechanical, Electrical, and Electronic Periscope components | SA |
| Levett Engineering. | Build to print Manufacturing and Servicing of Mechanical Periscope components | SA |
| Hofmann Engineering | Non Destructive Testing (NDT) | WA |
| Australian Metrology and Calibration (AMC), | Non Destructive Testing (NDT) | SA |
| Defence Coating Systems | Coating solutions | SA |
| Form Cut | Packaging Services | SA |

Notwithstanding the maturity of the present supply chain, BAE Systems is always exploring other possible component suppliers and subcontractors in an attempt to gain better value for money for the CoA. We intend to maintain that focus for the foreseeable future.

Industry Engagement

Australian industry may register their interest in future opportunities by contacting BAE Systems representative for the Periscope ISS Contract.

The Periscope ISS Supply Support Manager is responsible for market testing of local industry to ensure that that aims of the AICP are delivered when there is a requirement to change or add a subcontractor.
