## **Public AIC Plan**

WORLD FUEL SERVICES (AUST) PTY LTD  
JNT 8190 DEPLOYABLE BULK FUEL DISTRIBUTION SYSTEM  
PUBLIC AUSTRALIAN INDUSTRY CAPABILITY PLAN (ACQUISITION)  
(DID-PM-AIC-AICP-V4.0 APPENDIX 3)

### **Company Details**

The company details for World Fuel Services (Australia) Pty Ltd (WFS-A) are provided below:

- Company Name - World Fuel Services (Australia) Pty Ltd
- Address - Level 3, 179 Queen Street, Melbourne VIC 3000
- Website - <https://aviation.wfscorp.com/country-pages/australia-and-new-zealand-aviation>

### **Executive Summary**

JNT 8190 Phase 1 (Acquisition) is the provision of a Deployable Bulk Fuel Distribution System, to the Commonwealth of Australia (CoA). WFS-A is the Contractor delivering the capability to the CoA, supported by its Australian industry partners. The primary elements of the program that will be conducted in Australia include:

- a. Production;
- b. Project Management;
- c. System Engineering;
- d. Integrated Logistics Services;
- e. Configuration Management;
- f. Verification and Validation; and
- g. Quality Management.

The duration of the JNT 8190 Phase 1 Contract (Acquisition) is from April 2023 until December 2027. The Australia Contract Expenditure value is \$79M, with the Australia Industry Activity value being \$51M.

There are no CoA identified Sovereign Industrial Capability Priorities associated with this contract.

The details of the various Australian Subcontractors that will support WFS-A in delivering JNT 8190 are provided within Table 1.

<b>Spill Station Australia</b>	3 Blackfriar Place, Wetherill Park NSW 2164	Production

There are currently no training initiatives offered to Australian industry as part of the JNT 8190 Phase 1 Contract (Acquisition).

**Scope of Future Work Opportunities**

The system being provided to the CoA under JNT 8190 Phase 1 is a mature system. Any future opportunities will likely arise under the Support Plan, rather than the Acquisition Plan. Whilst the capability being provided is a mature capability, the type of local companies that could still potentially benefit the JNT 8190 program in acquisition are those with production capability, providing deployable fuel storage subsystems and componentry.

**Future Opportunities – Industry Engagement**

The process for future supplier engagement (existing and potential) will primarily be via annual Supplier Conferences, though any potential local supplier is also encouraged to contact WFS-A on the contact details provided below, to together discuss opportunities. Existing and potential suppliers will be made aware of planned conferences via information provided to the ICN for its distribution to ICN membership. Potential suppliers from across Australia will be encouraged to attend the conferences. Supplier Conferences will generally involve not only WFS-A but also a number of its subcontractors, providing industry with a broader array of companies to meet with and potential opportunities to pursue.
